Activity 2: DBS: Translate 'Live more, Bank less' into Business Value

Course C233

Objective

Demonstrate appreciation of a service brand and its competitive advantage

Documented real-event basis

DBS states that its brand promise is 'Live more, Bank less' and describes making banking simple and effortless so customers can spend more time on what matters.

Scenario

A regional business bank wants to learn from the logic of DBS's promise without copying its words. The bank must identify a customer outcome it can credibly own and show how delivery would create value.

Primary source

https://www.dbs.com/about-us/who-we-are/our-promise-to-you

Training assumptions

• The regional bank and performance data are fictional; no DBS operating metrics are supplied or inferred.

• Small-business customers report repeated-document requests, slow onboarding and unclear case ownership.

• Management defines success as lower customer effort and faster time to first value, subject to compliance controls.

• The team may redesign one journey but cannot replace the core banking platform this quarter.

Questions

1. What customer outcome makes the DBS promise relevant rather than merely memorable?

2. Which service capabilities would be required to make a comparable promise credible?

3. How could improved delivery affect trust, retention, referral and cost-to-serve?

4. Which alternative explanations must be considered before claiming business impact?

Expected output

Promise-to-impact logic model and 250-word management narrative

Acceptance test

The logic model contains capability, delivery, customer and business layers; every causal claim is labelled; and the proposed promise is original, relevant and deliverable.
